Smart Growth & CEE Strategies 2020 Digital Transformation within the Austrian and CEE Insurance

Many things have changed in the insurance industry in recent years. A new generation of consumers and their behaviors has appeared on the scene and digitalization has made great inroads. These two trends will require change in the business and operating model.

“Success Factors of Digital Innovation and Business Transformation” is one of our main topics at this year’s InsuranceCom 2018 for Central and Eastern Europe. We try to get qualified answers from industry experts to these challenges, current industry trends and growth opportunities for insurers in the coming five to ten years.

The InsuranceCom AT/CEE Senior Executive Conference on November 12/13, 2018 in Vienna will feature this spectrum of strategic questions and topics. In times of change and transformation, the exchange of experiences and opinions is indispensable. The InsuranceCom AT/CEE community is composed of individually selected senior executive and AT/CEE insurance experts. They will present and discuss challenging theses and arising industry trends.

InsuranceCom – the platform where Senior decision-makers of the Central and Eastern European Insurance industry meet and exchange their experiences.
